

MUHAMMAD HASSAN

MERN Stack Developer | React.js & Next.js

+92 332 4963845 | hassanmansoor518@gmail.com | Karachi, Pakistan | [GitHub: hassanMansoor518](https://github.com/hassanMansoor518) | [Portfolio](#)

PROFILE SUMMARY

MERN Stack Developer with hands-on experience building and shipping production-ready web apps, including a multi-tenant AI SaaS platform, a collaborative dev-tools product, and a live food delivery app. Proficient in React.js, Next.js, Node.js, Express.js, and MongoDB, with experience integrating third-party APIs (GitHub OAuth, Google Gemini), JWT authentication, REST APIs, and real-time features. Comfortable converting Figma designs into responsive, pixel-perfect UIs. Looking to contribute as a Full-Stack / Frontend Developer.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Typescript, HTML5, CSS3, Python

Frameworks / Libraries: React.js, Next.js, Node.js, Express.js, Redux, React Router, Tailwind CSS, Axios

Databases: MongoDB, Mongoose ODM

Concepts: REST APIs, JWT Authentication, MVC Architecture, Component-Based UI, Responsive & Mobile-First Design, State Management, Figma-to-Code Conversion

Developer Tools: Git, GitHub, VS Code, Postman, npm, Vercel

CERTIFICATIONS

- Frontend Development with React.js & Next.js — BanoQabil (2025)

PROJECTS

DevCollab — AI-Powered Collaborative Development Platform

React.js, Node.js, Express.js, MongoDB, Tailwind CSS | [Live Demo](#) | [GitHub Repo](#)

- Built a collaborative development platform enabling teams to manage projects, track commits, and communicate in real time.
- Integrated GitHub OAuth and API for commit-timeline visualization and project visibility across teams.
- Built AI-powered code analysis that scans files for quality issues and offers one-click Quick Fix refactoring.
- Implemented real-time workspace chat, AI-assisted chat, and WebRTC audio/video calls for team collaboration.

SupportPilot — AI-Powered Customer Support SaaS Platform

Next.js 15, MongoDB, NextAuth.js, Google Gemini API | [Live Demo](#) | [GitHub Repo](#)

- Built a multi-tenant SaaS platform letting businesses configure and embed AI chat widgets via a single script tag, powered by Google Gemini.
- Developed a lightweight, dependency-free vanilla JS embeddable chat widget with a custom UI to minimize load footprint on host sites.
- Built a chatbot playground for testing prompts, managing conversational context, and debugging AI interactions pre-deployment.
- Built a billing module covering subscription plan management, usage tracking, invoice history, and upgrade/cancel flows.

Reel-Style Food Delivery App

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT | [Live Demo](#) | [GitHub Repo](#)

- Built a scalable MERN food delivery platform with 15+ REST API endpoints, JWT auth, and real-time order management across user, restaurant, and admin roles.
- Implemented a vertical reel-scroll (TikTok-style) UI with infinite scrolling and responsive food cards using Tailwind CSS.
- Implemented JWT-based authentication and secure session management following MVC architecture principles.

EDUCATION

Sindh Madressatul Islam University — BS Software Engineering
